We handle the live animals with care in compliance with IATA Live Animals Regulations (LAR). You can also rely on our dedicated staff to ensure the welfare of the animals. Our B747-400 freighter regulates temperatures in the cargo compartment between 4°C and 29°C. A cabin pressure system also provides a comfortable environment for the animals.

LIVE ANIMALS

PERISHABLE CARGO

We offer special cargo for perishable products, those undergone quality deteriorates due to environmental conditions or due to time. We provide maximum attention to ensure the quality transportation of such products by keeping their freshness, against adverse changes in temperature or humidity. Temperature controlled containers maintain to carry the perishable goods. We deliver quickly and protected way by following the international standards and procedures.

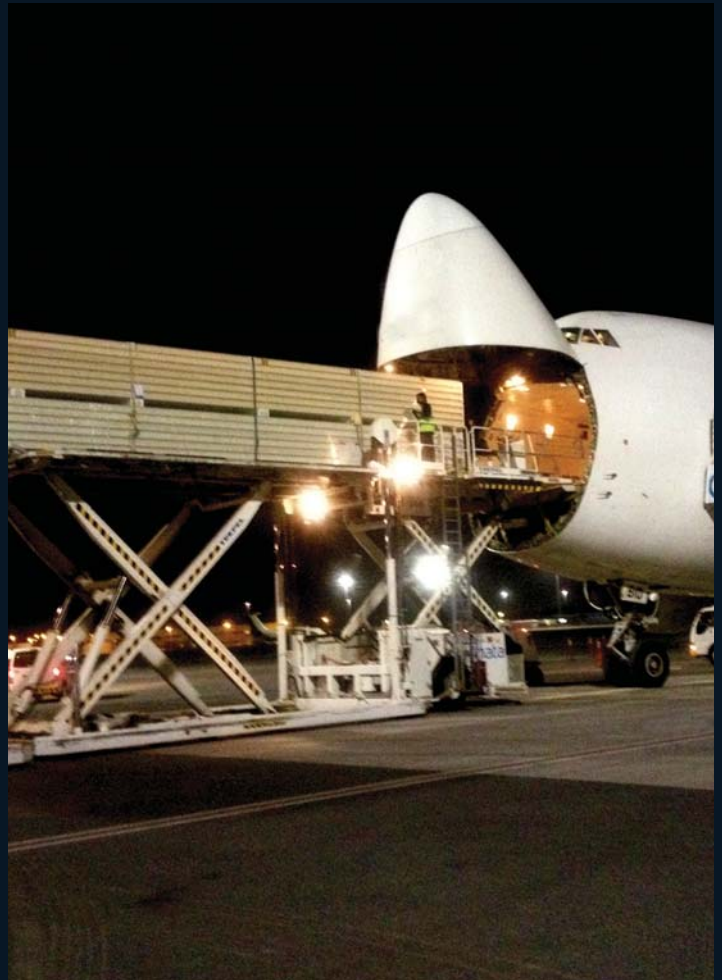

PHARMACEUTICALS

Health care products, especially medicines required special attention during transportation. Health products include drug, vaccines and other pharmaceuticals. These highly sensitive items need temperature controlled containers and environment. We provide a temperature controlled corridor in our cargo compartments from point of loading to unloading with a temperature between 4°C to 29°C

Whole shipments of pharmaceuticals from Mumbai to Caracas has been transported perfect condition, and they must open just as they reach their destination.

SPECIALIZED SOLUTIONS

Cargo that requires special handling or protection, such as pyrotechnics, detonators, watches, and precision instruments. we've been shipping cargo that's "too heavy", "too wide" or "too long". With a full arsenal of special equipment we are uniquely prepared to overcome any nonstandard challenge. Fleet of open nose and door 747 400's and other tools, our load maestros are experts in repositioning for maximum loading capacity.

It's anything which, if not handled correctly, could harm human, other shipments or the environment. If you're not sure whether your shipment is dangerous or not, ask the manufacturer or supplier for a Material Safety Data Sheet (MSDS). If it contains a UN number, it's dangerous goods. Alternatively, you can just contact us. We are fully comply with the IATA Dangerous Goods Regulations when transporting restricted goods. Its shippers responsible for identifying and classifying all dangerous goods, such as packing, marking, and labeling, in compliance with IATA regulations.

DANGEROUS GOODS
